

DESCRIPTION

The BarrierGate is a longitudinal barrier that opens to provide a 12.8 m wide opening for controlled access through otherwise rigid barrier.

The BarrierGate is crashworthy and has been thoroughly tested to the National Cooperative Highway Research Program, Report 350 (NCHRP 350) testing procedures for TL-3 LON/T conditions, up to 100 km/h.

The BarrierGate is capable of preventing vehicle penetration, vaulting, and underriding during TL3 LON/T impacts and redirecting the vehicle.

- Non-gating
- Redirecting
- Non-pocketing
- Length of opening: 12.8 m
- Height: 874 mm
- Width: 722 mm
